SECTION 2: Planning Report

Background:

It is proposed to amalgamate 1.55 ha of a Crown grant offer (File No. 5407814) with DL 11735 to create a 2.89 ha parcel. The proposal is to rezone from Rural 3 (RR 3) and Resource/Agricultural (R/A) zones to Rural 2 (RR 2) zone in Central Cariboo Area Rural Land Use Bylaw No. 3503, 1999.

Location and Surroundings:

The proposal is located in a remote area on Quesnel Lake as shown in Appendix B. Whiffle Creek flows through the subject property and into Quesnel Lake as shown in Appendix D. The property is surrounded by unsurveyed Crown land.

Application History / Relevant Applications:

The rezoning application is associated with Crown grant offer File No. 5407814. The proponent has been offered a Crown lease subject to rezoning of the property to an appropriate residential zone that would reflect the proposed land uses.

CRD Regulations and Policies:

The proposal is supported by the Central Cariboo Area Rural Land Use Bylaw policies with regards to Crown land development policies. The property has been a Crown lease for decades and the intent of the rezoning is to appropriately zone the lease area for sale acquisition by the lease holders. RLUB Crown land policies Sections 3.6 states that:

3.6 Crown Lands

Recognizing that much of the land adjacent to existing settlements areas, not presently used for residential or agricultural purposes, remain as Crown land in the right of the Province, it is the policy of the Board to support the establishment and development of crown Land Plans for the subdivision of properties for development purposes on Crown lands, in accordance with the objectives and policies of this bylaw, to take advantage of existing community services, where available, and as not to conflict with agricultural or resources uses.

Due to the presence of Quesnel Lake and Whiffle Creek bordering the property, compliance with CRD Shoreland Management Policy is recommended for both riparian protection and on-site sewage disposal.

Rationale for Recommendations:

The purpose of this rezoning is to provide the private lake access for the property owners through the Crown grant parcel. Therefore, planning staff is supportive of the rezoning amendment as the proposal complies with the Crown Land Policies and Objectives of the Central Cariboo Area RLUB.

Development on the Crown grant parcel is limited, as much of the parcel will be covered by the riparian protection area. The Ministry of Forest, Lands, Natural Resource Operations and Rural Development is supportive of the Shoreland Management covenant as CRD requirement for the use of existing dry cabins.

Recommendation:

That the Cariboo Regional District Central Cariboo Area Rural Land Use Bylaw Amendment Bylaw No. 5133, 2018 be approved subject to the following condition:

1. The applicant offering to enter into and entering into a covenant to ensure compliance with the CRD Shoreland Management Policy with respect to sewage disposal system and riparian protection.

Further, that the cost of registration of the covenant be borne by the applicants.

Describe the existing use of the subject property and all buildings: _____

Vacant land apart from 2 small existing cabins near the upland parcel, dating from the 1960's.

The cabins/property are used for camping & fishing

Describe the proposed use of the subject property and all buildings: _____

To remain the same, camping and fishing

Describe the reasons in support for the application: The rezoning of this land will permit the new owners of the upland property to acquire the Crown Grant for the land. This will allow them to gain access via water to their property. The only reason this land was not acquired by the original owner in the 1950's was due to a potential hydro dam on Quesnel River, which restricted property acquisition below 2400' in elevation along the lake.

Provide a general description of vegetation cover (i.e. treed, grassland, forage crop etc.): _____

Existing natural vegetation (trees, shrubs etc).

Provide general geographical information (i.e. existing lakes, streams, physical features etc.): _____

The property lies next to Quesnel Lake, and is bisected by Whiffle Creek.

The west cabin is approximately 15m from Whiffle Creek. East cabin would be approximately 25m from Whiffle Creek. Both cabins are set back approximately 25m from Quesnel Lake

Fish Streams

Whiffle Creek is classified as an S4 stream (fish bearing, <1.5 m wide). There are historical records of fish species such as Chinook salmon, coho salmon and, rainbow trout in Whiffle Creek. The land use objectives under the Cariboo-Chilcotin Land Use Plan (CCLUP) specify that riparian vegetation should be maintained along S4 streams to keep stream channel processes and bank stability, except at road crossings. In addition, adverse changes to the organic input and shading of streams should be minimized. The implementation of the Shoreland Management Policy along Whiffle Creek should help protect the riparian vegetation.

Lakes

Quesnel Lake is classified as an L1 lake (>1000 ha), and under CCLUP, a 10 m riparian reserve zone should be maintained. The implementation of the Shoreland Management Policy along Quesnel Lake should help protect the riparian vegetation.

Works in or about a Stream

Any work completed in or around Quesnel Lake or Whiffle Creek, such as (**but not limited to**) erosion protection, constructing a pier, wharf or dock, or a stream crossing will require a notification or approval under Section 11 of the *Water Sustainability Act*. More information can be found at www.frontcounterbc.gov.bc.ca.
