2019 Business Plan Solid Waste Management Plan (1009)

Peter Hughes, Manager of Environmental Services

Working in partnership with communities, large and small, to make the Cariboo Chilcotin a socially, economically and environmentally desirable region to live, work and play.

Department/Function Services

The Solid Waste Management Plan function was established to finance the development of Solid Waste Management Plans, which are required every ten years. The function also funds Plan amendments and jointly funded services, such as the recycling hotline and reduction and reuse promotion.

Taxation is collected by way of assessment of land and improvements and the level of taxation is regulated by overall costs provided in the Solid Waste Management Plan.

All members of the Board are responsible for the governance of this service.

Business Plan Goals, Objectives & Strategies

The next Solid Waste Management Plan will not have to be started until 2021, but preparatory work may begin in 2020.

The Cariboo Regional District is a signatory on the Province of BC/UBCM Climate Action Charter, and has committed to continuing work towards carbon neutrality in respect of corporate operations.

Overall Financial Impact

At the current requisition levels, there will not be sufficient funds in 2021 to complete the Solid Waste Management Plan. Requisition will need to be increased or alternate funding, such as Community Works Funds, should be allocated.
