

ALR Information Package

File Number: 3015-20/L20180050

Subdivision 21(2) Non-Farm Use 20(3) Exclusion 30(1)

Electoral Area: L

Date of Referral: October 26, 2018

Date of Application: October 4, 2018

Property Owner's Name(s): Bonafide Builders Ltd. / Simore Developing Ltd.

Applicant's Name: Maziar Rahmati

SECTION 1: Property Summary

Legal Description(s): District Lot 3867, Lillooet District, Except Plans 20244 and KAP52993, Part Lying South of the Southerly Boundary of the Road Shown on Plan 20244

Area of Application: 48.1 ha (118.85 ac)

Location: 6262 Mulligan Drive

Current Designation:

General Residential

Current Zoning:

Rural 1 (RR 1)

Current Land Use: *BC Assessment - 150 - Beef*

Agricultural Capability Classification:

Canada Land Inventory: Class 1 = Best, Class 7 = Worst

% of parcel

%100

Unimproved rating

% 100 Class 3 – Adverse Climate
(excluding precipitation)

Improved rating

No Improved rating

The agricultural capability classification of the property is Class 3. The limiting factors are noted as adverse climate (excluding precipitation). Class 3 soils are capable of producing a fairly wide range of crops under good management practices. Soil and/or climate limitations are somewhat restrictive.

No improved rating

note: the information above is an interpretation of Agricultural Capability from the Canada Land Inventory mapsheet #92P/11 (scale 1:50,000). An on-site visit of the property has not been conducted.

Proposed Use: To subdivide the parcel into approximately 50 residential lots

SECTION 2: Planning Report

Background:

The application is to exclude 48.1 ha (118.85 ac) property from Agricultural Land Reserve (ALR) status to support the growth of the community by including approximately 50 new residential lots to the north, east and west, while maintaining agricultural lots to the south of the subject parcel. Thus, achieving more usage and value to the property. The applicant has requested this exclusion to provide more flexibility to the subject property.

The subject property is zoned Rural 1 (RR 1) in the South Cariboo Area Zoning Bylaw No. 3501, 1999, and designated General Residential in the South Cariboo Official Community Plan Bylaw No. 3100.

Location and Soil Information:

The agricultural capability classification of the property is Class 3. The limiting factors are noted as adverse climate (excluding precipitation). Class 3 soils are capable of producing a fairly wide range of crops under good management practices. Soil and climate limitations are somewhat restrictive.

The land capability classification gives two ratings: unimproved and improved. The “improved” rating indicates the land’s potential once the appropriate management practice identified by the limiting factors has been implemented. The soil map indicates the improved ratings remain unchanged.

There is mostly single-family residential lots surrounding the subject property with Horse Lake to the north and agricultural parcels to the south of the property.

CRD Regulations and Policies:

South Cariboo Area Zoning Bylaw No. 3501, 1999

5.18 RURAL 1 (RR 1) ZONE

5.18.1 USES PERMITTED

- (a) RESIDENTIAL USES:
 - i) a single-family residential dwellings; or
 - ii) a two-family residential dwelling unit / duplex;

5.18.2 ZONE PROVISIONS

No person shall, within RR 1 Zone, use any lot or erect, alter or use any building or structure except in accordance with the following provision:

- (a) LOT AREA (minimum): = 4 hectares (9.88 acres)

7.7 RESIDENTIAL DESIGNATIONS

- GENERAL RESIDENTIAL – (RG)

area where a range of parcel sizes from a minimum size of 0.8 hectare to a maximum of 3.9 hectares and an average lot size of 2 hectares shall be maintained.

A parcel greater than 3.9 hectares could be created providing that all other parcels in the proposed subdivision total an average of 2 hectares with no parcel smaller than 0.8 hectare.

Rationale for Recommendations:

As the soil classification for this property is designated as Class 3 which can produce fairly wide range of crops and the proposal has received significant number of opposition letters from the community, planning staff suggests that the application for ALR exclusion be rejected.

Further, the application be submitted to the Provincial Agricultural Land Commission with a recommendation for disapproval.

SECTION 3: Referral Comments

Advisory Planning Commission: December 5, 2018
Rejected. See Comments Attached.

Provincial Agricultural Land Commission - Applicant Submission

Application ID: 58167

Application Status: Under LG Review

Applicant: Bonafide Builders Ltd. , Simore Developing Ltd.

Agent: Maziar Rahmati

Local Government: Cariboo Regional District

Local Government Date of Receipt: 10/04/2018

ALC Date of Receipt: This application has not been submitted to ALC yet.

Proposal Type: Exclusion

Proposal: The purpose of this proposal is to support the growth of the community and neighborhood to achieve more usage and value to the subject parcel.

Currently, the North end of the parcel is neighboring Horse Lake. The East and West ends of the parcel are neighbored by single family residential parcels. The South end of the parcel is neighbored by agricultural parcels. This application for exclusion will provide more flexibility to the parcel to serve the growth of the community and neighborhood. The application is to support new residential lots to the North, East and West, while providing and maintaining agricultural lots to the South. All while providing new roads/infrastructure and utilities to the parcel which will form part of the community and neighborhood. That said, we are applying for exclusion from the ALR to support the growth of the community, while still maintaining and serving agricultural land to the south of the parcel.

Agent Information

Parcel Information

Parcel(s) Under Application

1. **Ownership Type:** Fee Simple

Parcel Identifier: 013-360-248

Legal Description: DL 3867 LILLOOET EXC (1) PLS 20244 & KAP52993 (2) PT LYING S OF THE SLY BDY OF THE RD SHOWN ON PL 20244

Parcel Area: 48.1 ha

Civic Address: 6262 Mulligan Drive, 100 Mile House, BC

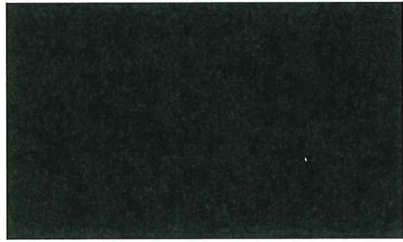

Date of Purchase: 06/26/2018

Farm Classification: Yes

Owners

1. **Name:** Bonafide Builders Ltd.

Applicant: Bonafide Builders Ltd. , Simore Developing Ltd.

2. **Name:** Simore Developing Ltd.

Address:

Current Use of Parcels Under Application

1. Quantify and describe in detail all agriculture that currently takes place on the parcel(s).

Currently the subject property is roughly 121 acres. Out of the parcel area available, we have a lease agreement with a local farmer who pastures cattle on the subject property, utilizing only half of the subject property for this purpose (50%, roughly 61 acres). This is the only agricultural activity that takes place on the subject property.

2. Quantify and describe in detail all agricultural improvements made to the parcel(s).

No agricultural improvements.

3. Quantify and describe all non-agricultural uses that currently take place on the parcel(s).

A house/single family dwelling is on the subject property utilized by the property owners.

Adjacent Land Uses

North

Land Use Type: Residential

Specify Activity: Single family dwelling

East

Land Use Type: Residential

Specify Activity: Single family dwelling

South

Land Use Type: Agricultural/Farm

Specify Activity: Pasturing Cattle

West

Land Use Type: Residential

Specify Activity: Single family dwelling

Proposal

1. How many hectares are you proposing to exclude?

48.1 ha

2. What is the purpose of the proposal?

The purpose of this proposal is to support the growth of the community and neighborhood to achieve more usage and value to the subject parcel.

Currently, the North end of the parcel is neighboring Horse Lake. The East and West ends of the parcel are neighbored by single family residential parcels. The South end of the parcel is neighbored by agricultural parcels. This application for exclusion will provide more flexibility to the parcel to serve the growth of the community and neighborhood. The application is to support new residential lots to the North, East and West, while providing and maintaining agricultural lots to the South. All while providing new roads/infrastructure and utilities to the parcel which will form part of the community and neighborhood. That said, we are applying for exclusion from the ALR to support the growth of the community, while still maintaining and serving agricultural land to the south of the parcel.

3. Explain why you believe that the parcel(s) should be excluded from the ALR.

We believe the parcel is currently under utilized given its massive size and location. As currently the only agricultural activity is a lease agreement to pasture cattle on roughly half of the parcel (44 ha), this application would allow it to still maintain a similar amount of agricultural activity, while bringing roads/utilities/infrastructure to support the existing and adjacent residential community as well as support growth of the new residential community part of this application. As the ALR application process only provides a few application types, we feel this application type will provide the most flexibility to work with the Cariboo Regional District while maintaining existing agricultural activities on the parcel.

4. Describe any economic values you believe are applicable to the application as it applies to s.4.3 of the ALC Act.

The economical values brought forth by this proposal are extensive to support the community and neighborhood. The civil work proposed for this application would provide large amount of work to the community in utilizing local contractors to facilitate the proposed road work, utility work and misc. infrastructure work. Not only will this bring jobs to the community, it will also support growth of the community. The neighboring residential lots will receive new roads and this proposal should bring more housing to the area which will support the economic growth of the community surrounding Horse Lake. This proposal also provides agricultural lots at the South of the parcel, which will provide more reasonably sizes agricultural land that smaller farmers/businesses could/can acquire to support their farming and business activities. As the current economic value to the parcel is pasturing cattle at roughly half the size of the parcel, this application would allow the community to still maintain close to that level of farming activity on the parcel while providing huge economic benefits to the remainder of the parcel, the neighbors and the community as a whole.

5. Describe any cultural values you believe are applicable to the application as it applies to s.4.3 of the ALC Act.

The cultural values part of this application are really subject to the growth and natural progression of the community, neighbors surrounding the parcel and previous cultural activities.

With the North of the property being next to Horse Lake, this provides large recreational cultural uses as well as residential uses which is the main usage and culture of the neighborhood along South side of Horse Lake. The West and East ends of the property, being adjacent to and next to the subject parcel, are single family residential dwellings in which this application maintains the culture of the community by providing the proposed residential parcels. In addition, the proposal is to maintain the South of the parcel as subdivided agricultural land which will serve the culture of the South side of the parcel which is agricultural. That being said, this application will support the existing natural cultural values of the neighborhood and support the cultural growth of the community.

6. Describe any social values you believe are applicable to the application as it applies to s.4.3 of the ALC Act.

The social values part of this application are similar to the cultural values. The social values part of this application relates to supporting the social growth of the community while maintaining its social values. With the East and West ends of the parcel being existing residential single-family parcels, the existing social values of the neighbors there are of a residential nature. The same implies for the South end of the parcel being currently agricultural parcels. With the application maintaining agricultural lots at the South of the parcel, their social values will also be maintained. That said, the social values which are existing in the community surrounding the parcel will be maintained and extended on to support the communities existing and growing social values.

7. Describe any regional and community planning objectives you believe are applicable to the application as it applies to s.4.3 of the ALC Act.

There will be regional and community planning objectives that are applicable to this application. The Cariboo Regional District South Cariboo (CRD), have noted that they cannot formally comment on this proposal until the application is submitted to the ALC, however given the current zoning is RR1; that provides flexibility to work with the CRD and support their OCP and community growth objectives for the parcel and neighboring community. With the proposal, we would be providing new roads to connect East and West of the parcel, we would be providing misc. infrastructure to support the new residential and agricultural communities as well as providing utilities to suit. This would require us to work heavily with the CRDs planning department to support their community planning objectives while providing new residential lots, agricultural lots and associated roads/infrastructure and utilities. This would support the existing community and neighbors, while serving the growth of the community.

Re: 6262 Mulligan Drive, 100 Mile House
Portion of DL 3867 LD (page 3, image 1)
Proposed 55 lot subdivision of mainly 0.4 ha (2 acres) each (page 3, image 2)
Date: October 29, 2018

I am against the exclusion of the property from the Agricultural Land Reserve under Sec 30(1) of the Agricultural Land Commission Act (2002) and I am against the approval of its subdivision within the ALR under Sec 30(2)(c). Following are my reasons:

1. Develop non ALR land before developing good ALR land.
2. This property has been in the ALR since 1975. Land that is purchased as agricultural land should remain as agricultural land. Land that has the capability to provide food for future generations must be protected.
3. A previous application to have this property excluded from the ALR was made in 1994. It was rejected and one lot along the south boundary of the property was allowed (Image 3).
4. This property probably should not have been classified as general residential in the 1996 South Cariboo Official Community Plan (SCOCP). It should not be classified as Rural Residential in the 2018 proposed draft SCOCP.
5. This property was recommended by the CRD as part of a block exclusion in the current SCOCP (1996). The Agricultural Land Commission did not exclude it. It has not been recommended for exclusion in the proposed SCOCP (2018).
6. This land was purchased some four months ago, on June 28, 2018. This appears to be a developer looking to use cheaper agricultural land to create 55 residential lots.
7. Prime Agricultural Capability (Class 1-3) land makes up 1.10% of all the land in BC and as such is a scarce commodity. This 121 acre parcel is one of the largest Class 3 properties in Area L (image 4). It is amongst the best agricultural land in the SCOCP.
8. This property has been used for agricultural purposes for decades and has farm classification for taxation purposes. As such it is recognized as a food producer and should remain as agricultural in its present parcel size.
9. This property is mostly used for hay/cattle production but has an agricultural capability that would allow it to support a wider range of crops.
10. This property could be used or leased for more intensive farming. There are farms that regularly sell vegetables at the South Cariboo Farmers Market and are, according to Agricultural Capability Maps, on relatively poorer land. They include Horse Lake Community Farm Co-Op (east end of Horse Lake, class 4 and O5) and Big Rock Ranch (near Forest Grove, class 4 land).

11. There are other large ranch acreages in the area that have similar or poorer agricultural capability. The fields on the west end of Horse Lake and the fields to the west and north of 100 Mile House are mainly Class 4 with some Class 3. The fields bordering Sven Road and Horse Lake Road, at the east end of Horse Lake, are Class 3. Some of the large acreages at the west end of Horse Lake have applied for subdivision in the past and have been rejected.
12. We should be infilling closer to 100 Mile House and in the areas near this property that are out of the ALR or of poorer quality within the ALR rather than use the better quality agricultural land for residential purposes.
13. On average the CRD presently approves about one new lot for each home that is built in Area L. The stock of available land for residential purposes appears to be stable.
14. An increased density of homes on this property may further adversely affect the quality of Horse Lake's water. In the CRD's Shoreland Management Policy (2004) Horse Lake is classed as High sensitivity. Horse Lake is exhibiting signs of stress as shown by increased algae blooms in the summer and it should be protected from further development. Protections for the lake look good on paper but, being complaint driven, appear to be poorly enforced.
15. An increased density of homes on this property may adversely affect the water table and availability of water for existing homes along Fallsway Rd and Mulligan Drive.
16. An increased density of homes will increase the daily traffic on Horse Lake Road. The traffic on Horse Lake Road is presently a little less than that of the daily traffic on Highway 97 going through 100 Mile House. The proposed increase in traffic may not be suitable for an already busy rural two lane collector road.
17. Farm classification of agricultural properties for taxation purposes helps ensure that ranchers are supported in their livelihoods. That in turn helps maintain the rural character of Area L that many of its residents value.
18. The growing season in this area appears to be lengthening and as such the climate limitation (C) for agricultural capability may need to be reconsidered.
19. Residential development on prime agricultural land should be rejected.

Thank you for your time in considering these comments.

Yours sincerely,

Peter Crawshay
6142 Lakeshore Drive
100 Mile House, BC

The property in question:

PID 013-360-248 District Lot 3867 Lillooet District (Formerly Horse Lake Ranch owned by Larry and Ann Pinkney now owned by an unknown identity raises concerns about the possibility of taking the land parcel out of the Agricultural Land Reserve.

The above listed property is a significant land mass within the Horse Lake watershed and as is in its current state, protects one of the few remaining intact marsh/wetland areas left on the lake. I am not sure if this property will or will not be developed but considering that it could be developed I will express my concern about the alteration of the land from an environmental assessment perspective.

The waterfront portion of the property that currently interfaces with Horse Lake provides high biological value and supports primary and secondary productivity trophic levels that provide for one of the best fisheries in the Cariboo Region. The marsh/wetland also provides for the many bird species that nest and feed in the local area, some of which are respectively Species At Risk Act (SARA) and or Provincially Red and Blue listed species like the Rusty Blackbird and American Bittern. Amphibians can also be found in marsh/wetland areas and includes SARA listed species like the Western Toad, which typically use the upland areas during the summer and winter seasons. The upland area associated with the land parcel is also American Badger habitat, which happens to be a provincially red listed species. So in very few words one can understand the importance of keeping the land in the Agricultural land reserve and to avoid potential extirpation of the flora and fauna associated with the uplands and the marsh/wetland area bordering the riparian habitat. For a full list of SARA and Red and Blue listed species please respectfully refer to

https://wildlife-species.canada.ca/species-risk-registry/sar/index/default_e.cfm?styp=species&lng=e&index=1&common=&scientific=&population=&taxid=0&locid=0&desid=0&schid=0&desid2=0& and <http://a100.gov.bc.ca/pub/eswp/jsp/results.jsp?pager.offset=0> .

If for any reason the land in question is taken out of the Agricultural Land Reserve the property owner could do nothing, build a complex and or possibly subdivide the land into rural residential/recreational properties and be sold to prospective buyers. The later options would likely bring about irreversible harm to one of the last few remaining intact land parcels and wetland/marsh habitats on the lake.

As it is with most property developments, the landscape changes and the man made disturbances bring about insidious changes that alter existing habitats to the point where they will no longer support existing flora and fauna in their natural or semi natural state.

Soil erosion and runoff for example is a common problem with land developments and can consequently lead to the sedimentation of aquatic habitats. If not properly mitigated, sediments entering aquatic environments cloud the receiving waters, interfere with primary productivity and potentially smother the aquatic life that inhabit the wetland/marsh area stemming out from the edge of the riparian zone.

Sediment deposits can also alter the bathymetry and potentially displace and/or alter the diversity of plants that currently exist in the Willow Point area. Land developments associated with complexes and/or rural/recreational properties are often landscaped and manicured which means that anthropogenic substances like fertilizers (Nitrogen & Phosphorus) and pesticides are used to maintain the landscape look However these chemical substances migrate into aquifers that are used for domestic water supplies and/or make their way into aquatic environments. It is well known that nutrient loads into aquatic environments that are higher than the assimilative capacity of the ecosystem structure can over stimulate primary producing organisms like vascular and non-vascular plants and consequently alter the make up of the wetland/marsh area community.

Pesticide run off is another concern where low concentrations typically affect sensitive aquatic species, like mayflies, stoneflies and caddisflies as well as other important organisms that serve as food source for fish and wildlife.

In addition to the concerns mentioned above, land development associated with waterfronts inevitably includes infrastructure projects like boat launches and docks used for mooring watercrafts. The construction of these amenities includes fish habitat alteration and destruction and is only the beginning of an insidious process that leads to further habitat alteration and destruction when watercrafts plow the temporal spatial waters associated with sensitive aquatic habitats. Personal watercrafts and powerful boats used for water skiing for example use high powered engines that deliver tremendous forces that can literally move the earth, such that they can suspend sediments and create destructive wakes that have the potential to destabilize the Willow Point marsh/wetland habitat and potentially alter its existence forever if development was to occur.

Agricultural lands, wetlands and critical habitat have been on the decline for years and yet we incrementally have individuals looking for short-term gains at the expense of long-term losses. These small land parcel developments seem inconsequential but accumulatively impact the fish and wildlife populations within the province of British Columbia. The development of the property in question should be kept in the ALR and excluded from becoming a golf course, place of worship or any venture that changes its existence as pastoral land.

Please acknowledge receipt of this letter and thank you for your time.

Sincerely

Nick Russo

Re: PID 013-360-248 District Lot 3867 Lillooet District

To whom it may concern:

We are strongly opposed to the above application as being residents at 6205 Robin Road.

We have lived on Robin Road for approximately 21 yrs. We bought our first house at 6207 Robin Road and loved the area so much we bought the property next door and built our dream home. We chose this area for many reasons and have many concerns if this application goes through.

First being the beautiful wildlife we witness on a daily and seasonal basis. Moose, deer, heron, foxes are just a small few.

Secondly, we are concerned about the effects on our aquifer.

Thirdly, increased traffic on our quiet road. We built our home loving the fact our small daughter and the other kids on this road can safely ride their bikes as there is no through traffic. Fallsway can be dangerous with amount of traffic that travels through and the speed they go. We have many of the subdivision use our road for kids to ride their bikes up and down.

Lastly, is it really necessary to lose another piece of agriculture land? This land has been used as a piece of agricultural land for many many years and it seems like a travesty to dissolve it to subdivide.

Please understand we are not opposed to growth, which is good for our community, but we are opposed to key pieces of agricultural land being subdivided for unnecessary means.

Thank you for your time and your attention to this very serious matter.

 KristiFremlin33@gmail.com

Regarding: 6262 Mulligan Drive, 100 Mile House.

To whom this may concern,

I am writing this letter in regards to the exclusion application from the ALR for the property 6262 Mulligan Drive, 100 Mile House. I am in opposition to this application and its proposal to subdivide. This land is still suitable for agricultural purposes and to the best of my knowledge the current owners have not taken the proper steps to attempt to farm or use this land as such. Since much of the Cariboo/Chilcotin's grazing land was lost in the 2017 and 2018 wildfires I believe we need to preserve as much land in the ALR as possible. The owners intended use is to subdivide this property and I do not agree that we need more lots added to the Horse Lake area. A search on 100 Mile Remax shows 45 total homes, acreages, and lots for sale in the Horse Lake area with 18 of those being vacant land. I do not believe we need to subdivide usable farmland for the purpose of building additional homes. This property and its riparian zone is also home to a wide variety of animals including: deer, fox, bald eagles, sandhill canes, mallards, loons, and otters to name a few. It would be devastating to see these animals lose their homes due to an unnecessary development.

Please take my opposition into consideration when making a decision on whether or not to remove this property from the ALR. If you have any further questions in regards to my opposition please contact me by email.

Regards,

Kristi Fremlin

From: Melany Leontowich <melmo3@hotmail.com>
Sent: October 24, 2018 9:06 PM
To: Jackie Woodworth <jwoodworth@cariboord.ca>
Subject: ALR Exclusion Application PID 013-360-248

To whom it may concern:

In regards to the proposed property PID 013-360-248 District Lot 3867 being removed from the Agricultural Land Reserve (ALR) we strongly oppose the application. The property located at 6262 Mulligan Drive in 100 Mile House is an important ecological habitat for many species of birds, mammals and amphibians. If the proposed property is developed it will have a direct impact on many threatened or species of special concern as listed in the Species At Risk Act (SARA). Included in the application is a new road connecting to Robin Rd. Increased vehicle traffic will affect the migration of Western Toads from horse lake breeding grounds to their over wintering habitat. Many ground or low nesting birds including the Northern Saw-whet Owl, Common Nighthawk, Northern Harrier Hawks and many others will lose critical habitat for nesting and raising young. Removal of properties from the ALR means many mammals that move within a large territory have fewer places to rest away from humans and dangers. Species that are known to pass through this property include the endangered American Badger, Moose, Mule Deer and many others. Included in the species that will be affected is the endangered Little Brown Myotis bat, with bat populations being affected everyday due to habitat loss and available resting places, development of the proposed property would be a detrimental loss of habitat.

Critical habitat locations such as this property as mentioned above should not be removed from the ALR for development. I hope the district will reject the application and preserve the land.

To whom it may concern:

I am writing this letter in response to the proposal of 6282 mulligan drive subdivision. My family and I, along with our neighbors on Robin Road strongly oppose this proposal.

First and foremost. Safety of our children. We live on a dead end road. Which is the reason we bought here. A safe, quiet place to raise our children. Our kids ride bikes on Robin road. Anyone who comes onto this street has a reason to be here. Knows that there are children in the area and therefore, drive slow. However on the adjacent road, Fallsway, people drive out of control. Way to fast and recklessly, especially with blind hills and corners. Kids walk to the bus stop up fallsway to horse lake road and i fear for their safety as it stands already. Increase of traffic is just asking for trouble.

Second, if these 60 proposed lots go through, the aquafir will be tapped into more resulting in loss of water quality and possible contamination. Not to mention our taxes will increase.

Wildlife is another major concern. This land is used by all sorts of wildlife. We are blessed to live in such a beautiful area. Where this is not just our home, but home to countless animals. Building more lots is going to take away from the wildlife which is already suffering drastically. This will result in more wildlife in peoples property resulting in the destruction of these animals. Where we should be conserving this land for future generations.

I will not stand by and let this area be turned into yet another subdivision. I will fight this to the bitter end. There has been no vote or any information given to us about this proposal and I am told its already on the third reading. Again, I WILL fight this. I'm sure many others will too. Also getting the media involved.

Please take this letter seriously, from a member of the community and a father to a young child who wants to conserve the land for my daughters family one day. I don't want this area turning into what happened at Vancouver.

Please feel free to reach out to me anytime at [my email toddmarten@gmail.com](mailto:toddmarten@gmail.com) or via phone 250-395-6694

Thank you for your time.

Todd Marten

To Whom It May Concern:

Re: ALR Exclusion Application for PID 013-360-248 District Lot 3867 Lillooet District

We are strongly opposed to the above application for the following reasons:

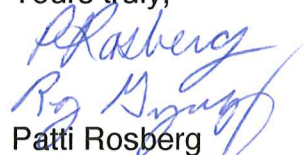

Once this land is taken out of the Agricultural Land Reserve (ALR) it can then be subdivided and developed. This will have a direct impact on the natural forest, as many of the trees will be taken down. Being a direct neighbour to this property, we have observed moose, deer, foxes, coyotes, sandhill cranes, bald eagles, hawks, owls, and many other small and large birds, as well as the "special concern" Western Toad and "endangered" American Badger and Northern Saw-Whet Owl. This will mean pushing them out of their habitat, with a risk to the survival of some. Cattle will also lose grazing land, which they have used for years.

The effect to the water quality of Horse Lake is a concern, as well as with many more lots accessing the aquifer, this could result in water shortages and contamination.

The development of this property will most likely mean extending Robin Rd. & Hunt Rd. through the property to Aalton Rd. These two roads connect to Fallsway Rd. and none of them are designed to take on more traffic. There are no sidewalks and being an avid walker in the area this is a concern for safety, especially in the winter. School children and teens also walk and bike ride on Fallsway, Robin & Hunt Roads to catch their school bus on Horse Lake Rd. Fallsway Rd. has curves and hills, so with increased traffic and pedestrians, accidents will happen.

Thank you for your attention to this serious matter.

Yours truly,

Patti Rosberg
Reg Gregory

NOV 05 2018

To: Agricultural Land Commission and Cariboo Regional District
Re: 6262 Mulligan Drive, 100 Mile House
Portion of DL 3867 LD (page 3, image 1)
Proposed 55 lot subdivision of mainly 0.4 ha (2 acres) each (page 3, image 2)
Date: October 29, 2018

Referred To
.....

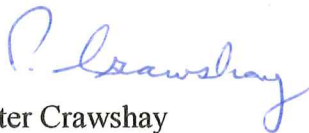

I am against the exclusion of the property from the Agricultural Land Reserve under Sec 30(1) of the Agricultural Land Commission Act (2002) and I am against the approval of its subdivision within the ALR under Sec 30(2)(c). Following are my reasons:

1. Develop non ALR land before developing good ALR land.
2. This property has been in the ALR since 1975. Land that is purchased as agricultural land should remain as agricultural land. Land that has the capability to provide food for future generations must be protected.
3. A previous application to have this property excluded from the ALR was made in 1994. It was rejected and one lot along the south boundary of the property was allowed (Image 3).
4. This property probably should not have been classified as general residential in the 1996 South Cariboo Official Community Plan (SCOCP). It should not be classified as Rural Residential in the 2018 proposed draft SCOCP.
5. This property was recommended by the CRD as part of a block exclusion in the current SCOCP (1996). The Agricultural Land Commission did not exclude it. It has not been recommended for exclusion in the proposed SCOCP (2018).
6. This land was purchased some four months ago, on June 28, 2018. This appears to be a developer looking to use cheaper agricultural land to create 55 residential lots.
7. Prime Agricultural Capability (Class 1-3) land makes up 1.10% of all the land in BC and as such is a scarce commodity. This 121 acre parcel is one of the largest Class 3 properties in Area L (image 4). It is amongst the best agricultural land in the SCOCP.
8. This property has been used for agricultural purposes for decades and has farm classification for taxation purposes. As such it is recognized as a food producer and should remain as agricultural in its present parcel size.
9. This property is mostly used for hay/cattle production but has an agricultural capability that would allow it to support a wider range of crops.
10. This property could be used or leased for more intensive farming. There are farms that regularly sell vegetables at the South Cariboo Farmers Market and are, according to Agricultural Capability Maps, on relatively poorer land. They include Horse Lake Community Farm Co-Op (east end of Horse Lake, class 4 and O5) and Big Rock Ranch (near Forest Grove, class 4 land).

11. There are other large ranch acreages in the area that have similar or poorer agricultural capability. The fields on the west end of Horse Lake and the fields to the west and north of 100 Mile House are mainly Class 4 with some Class 3. The fields bordering Sven Road and Horse Lake Road, at the east end of Horse Lake, are Class 3. Some of the large acreages at the west end of Horse Lake have applied for subdivision in the past and have been rejected.
12. We should be infilling closer to 100 Mile House and in the areas near this property that are out of the ALR or of poorer quality within the ALR rather than use the better quality agricultural land for residential purposes.
13. On average the CRD presently approves about one new lot for each home that is built in Area L. The stock of available land for residential purposes appears to be stable.
14. An increased density of homes on this property may further adversely affect the quality of Horse Lake's water. In the CRD's Shoreland Management Policy (2004) Horse Lake is classed as High sensitivity. Horse Lake is exhibiting signs of stress as shown by increased algae blooms in the summer and it should be protected from further development. Protections for the lake look good on paper but, being complaint driven, appear to be poorly enforced.
15. An increased density of homes on this property may adversely affect the water table and availability of water for existing homes along Fallsway Rd and Mulligan Drive.
16. An increased density of homes will increase the daily traffic on Horse Lake Road. The traffic on Horse Lake Road is presently a little less than that of the daily traffic on Highway 97 going through 100 Mile House. The proposed increase in traffic may not be suitable for an already busy rural two lane collector road.
17. Farm classification of agricultural properties for taxation purposes helps ensure that ranchers are supported in their livelihoods. That in turn helps maintain the rural character of Area L that many of its residents value.
18. The growing season in this area appears to be lengthening and as such the climate limitation (C) for agricultural capability may need to be reconsidered.
19. Residential development on prime agricultural land should be rejected.

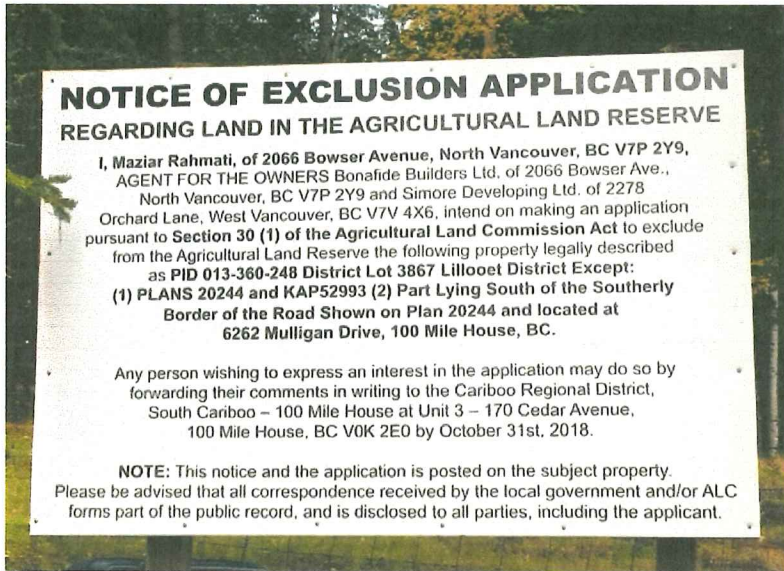

Thank you for your time in considering these comments.

Yours sincerely,

Peter Crawshay

Re: ALR Exclusion Application for
PID 013-360-248 District Lot 3867 Lillooet District

I am opposed to the above application for the following reasons (check all that apply):

- The most obvious is we aren't making any more agricultural land – this property is prime cattle grazing land and has been used for this for years, including this year.
- The effect on Horse Lake – the property is waterfront (riparian zone) and the lake is part of the watershed that supplies thousands of people with water including the Anderson Subdivision, 100 Mile House and the Canim Lake Band.
- The effect on area wells (aquifers) with a denser population.
- This is **not** part of the Draft Official Community Plan (OCP) as seen in Schedule J
- The effect on wildlife:
 - Sand hill cranes nest and raise young on this property every year
 - Wildlife that has been observed feeding on this property:
 - great grey owl
 - fox
 - golden eagle
 - coyote
 - bald eagle
 - red tailed hawk
 - American kestrel
 - osprey
 - deer
 - moose
 - northern harrier
 - red shouldered hawk
 - northern shrike
 - bohemian waxwing

This land is also good badger habitat (badgers are endangered).

Yours sincerely,

cc: Agricultural Land Commission

PID 013-360-248 District Lot 3867 Lillooet District

I am opposed to the above application for the following reasons (check all that apply):

- The most obvious is we aren't making any more agricultural land – this property is prime cattle grazing land and has been used for this for years, including this year.
- The effect on Horse Lake – the property is waterfront (riparian zone) and the lake is part of the watershed that supplies thousands of people with water including the Anderson Subdivision, 100 Mile House and the Canim Lake Band.
- The effect on area wells (aquifers) with a denser population.
- This is **not** part of the Draft Official Community Plan (OCP) as seen in Schedule J.
- The effect on wildlife:
 - o Sand hill cranes nest and raise young on this property every year
 - o Wildlife that has been observed feeding on this property:
 - great grey owl
 - fox
 - golden eagle
 - coyote
 - bald eagle
 - red tailed hawk
 - American kestrel
 - osprey
 - deer
 - moose
 - northern harrier
 - red shouldered hawk
 - northern shrike
 - bohemian waxwing

This land is also good badger habitat (badgers are endangered).

Yours sincerely,

cc: Agricultural Land Commission

Re: ALR Exclusion Application for
PID 013-360-248 District Lot 3867 Lillooet District

I am opposed to the above application for the following reasons (check all that apply):

- The most obvious is we aren't making any more agricultural land – this property is prime cattle grazing land and has been used for this for years, including this year.
- The effect on Horse Lake – the property is waterfront (riparian zone) and the lake is part of the watershed that supplies thousands of people with water including the Anderson Subdivision, 100 Mile House and the Canim Lake Band.
- The effect on area wells (aquifers) with a denser population.
- This is **not** part of the Draft Official Community Plan (OCP) as seen in Schedule J.
- The effect on wildlife:
 - o Sand hill cranes nest and raise young on this property every year
 - o Wildlife that has been observed feeding on this property:
 - great grey owl
 - fox
 - golden eagle
 - coyote
 - bald eagle
 - red tailed hawk
 - American kestrel
 - osprey
 - deer
 - moose
 - northern harrier
 - red shouldered hawk
 - northern shrike
 - bohemian waxwing

This land is also good badger habitat (badgers are endangered).

Re: **ALR Exclusion Application for**
PID 013-360-248 District Lot 3867 Lillooet District

I am opposed to the above application for the following reasons (check all that apply):

- The most obvious is we aren't making any more agricultural land – this property is prime cattle grazing land and has been used for this for years, including this year.
- The effect on Horse Lake – the property is waterfront (riparian zone) and the lake is part of the watershed that supplies thousands of people with water including the Anderson Subdivision, 100 Mile House and the Canim Lake Band.
- The effect on area wells (aquifers) with a denser population.
- This is **not** part of the Draft Official Community Plan (OCP) as seen in Schedule J.
- The effect on wildlife:
 - o Sand hill cranes nest and raise young on this property every year
 - o Wildlife that has been observed feeding on this property:
 - great grey owl
 - fox
 - golden eagle
 - coyote
 - bald eagle
 - red tailed hawk
 - American kestrel
 - osprey
 - deer
 - moose
 - northern harrier
 - red shouldered hawk
 - northern shrike
 - bohemian waxwing

This land is also good badger habitat (badgers are endangered).

Yours sincerely,

PID 013-360-248 District Lot 3867 Lillooet District

I am opposed to the above application for the following reasons (check all that apply):

- The most obvious is we aren't making any more agricultural land – this property is prime cattle grazing land and has been used for this for years, including this year.
- The effect on Horse Lake – the property is waterfront (riparian zone) and the lake is part of the watershed that supplies thousands of people with water including the Anderson Subdivision, 100 Mile House and the Canim Lake Band.
- The effect on area wells (aquifers) with a denser population.
- This is **not** part of the Draft Official Community Plan (OCP) as seen in Schedule J.
- The effect on wildlife:
 - o Sand hill cranes nest and raise young on this property every year
 - o Wildlife that has been observed feeding on this property:
 - great grey owl
 - fox
 - golden eagle
 - coyote
 - bald eagle
 - red tailed hawk
 - American kestrel
 - osprey
 - deer
 - moose
 - northern harrier
 - red shouldered hawk
 - northern shrike
 - bohemian waxwing

This land is also good badger habitat (badgers are endangered).

Yours sincerely,

Nick Russo

Re: ALR Exclusion Application for
PID 013-360-248 District Lot 3867 Lillooet District

I am opposed to the above application for the following reasons (check all that apply):

- The most obvious is we aren't making any more agricultural land – this property is prime cattle grazing land and has been used for this for years, including this year.
- The effect on Horse Lake – the property is waterfront (riparian zone) and the lake is part of the watershed that supplies thousands of people with water including the Anderson Subdivision, 100 Mile House and the Canim Lake Band.
- The effect on area wells (aquifers) with a denser population.
- This is **not** part of the Draft Official Community Plan (OCP) as seen in Schedule J.
- The effect on wildlife:
 - Sand hill cranes nest and raise young on this property every year
 - Wildlife that has been observed feeding on this property:

<input type="checkbox"/> great grey owl	<input type="checkbox"/> osprey
<input type="checkbox"/> fox	<input type="checkbox"/> deer
<input type="checkbox"/> golden eagle	<input type="checkbox"/> moose
<input type="checkbox"/> coyote	<input type="checkbox"/> northern harrier
<input type="checkbox"/> bald eagle	<input type="checkbox"/> red shouldered hawk
<input type="checkbox"/> red tailed hawk	<input type="checkbox"/> northern shrike
<input type="checkbox"/> American kestrel	<input type="checkbox"/> bohemian waxwing

This land is also good badger habitat (badgers are endangered).

Yours sincerely,

Colleen Gauthier Cariboo Regional District

Re: ALR Exclusion Application for
PID 013-360-248 District Lot 3867 Lillooet District

I am opposed to the above application for the following reasons (check all that apply):

- The most obvious is we aren't making any more agricultural land – this property is prime cattle grazing land and has been used for this for years, including this year.
- The effect on Horse Lake – the property is waterfront (riparian zone) and the lake is part of the watershed that supplies thousands of people with water including the Anderson Subdivision, 100 Mile House and the Canim Lake Band.
- The effect on area wells (aquifers) with a denser population.
- This is **not** part of the Draft Official Community Plan (OCP) as seen in Schedule J.
- The effect on wildlife:
 - o Sand hill cranes nest and raise young on this property every year
 - o Wildlife that has been observed feeding on this property:
 - great grey owl
 - fox
 - golden eagle
 - coyote
 - bald eagle
 - red tailed hawk
 - American kestrel
 - osprey
 - deer
 - moose
 - northern harrier
 - red shouldered hawk
 - northern shrike
 - bohemian waxwing

This land is also good badger habitat (badgers are endangered).

Yours sincerely,

Lorna Schmitt

I am opposed to the above application for the following reasons (check all that apply):

- The most obvious is we aren't making any more agricultural land – this property is prime cattle grazing land and has been used for this for years, including this year.
- The effect on Horse Lake – the property is waterfront (riparian zone) and the lake is part of the watershed that supplies thousands of people with water including the Anderson Subdivision, 100 Mile House and the Canim Lake Band.
- The effect on area wells (aquifers) with a denser population.
- This is **not** part of the Draft Official Community Plan (OCP) as seen in Schedule J.
- The effect on wildlife:
 - Sand hill cranes nest and raise young on this property every year
 - Wildlife that has been observed feeding on this property:

▪ great grey owl	▪ osprey
▪ fox	▪ deer
▪ golden eagle	▪ moose
▪ coyote	▪ northern harrier
▪ bald eagle	▪ red shouldered hawk
▪ red tailed hawk	▪ northern shrike
▪ American kestrel	▪ bohemian waxwing

This land is also good badger habitat (badgers are endangered).

Yours sincerely,

Cariboo Regional District

I am opposed to the above application for the following reasons (check all that apply):

- The most obvious is we aren't making any more agricultural land – this property is prime cattle grazing land and has been used for this for years, including this year.
- The effect on Horse Lake – the property is waterfront (riparian zone) and the lake is part of the watershed that supplies thousands of people with water including the Anderson Subdivision, 100 Mile House and the Canim Lake Band.
- The effect on area wells (aquifers) with a denser population.
- This is **not** part of the Draft Official Community Plan (OCP) as seen in Schedule J.
- The effect on wildlife:
 - o Sand hill cranes nest and raise young on this property every year
 - o Wildlife that has been observed feeding on this property:
 - great grey owl
 - fox
 - golden eagle
 - coyote
 - bald eagle
 - red tailed hawk
 - American kestrel
 - osprey
 - deer
 - moose
 - northern harrier
 - red shouldered hawk
 - northern shrike
 - bohemian waxwing

This land is also good badger habitat (badgers are endangered).

Yours sincerely,
