Re: Letter of support for ABC Communications Connecting British Columbia Program

Dear Board of Directors

ABC Communications is seeking the support of the Cariboo Regional District in our application to the Connecting British Columbia funding program.

With the support of the Cariboo Regional District, ABC Communications will develop a proposal to service the community of 150 Mile House with modern urban network infrastructure. Once implemented this Network infrastructure will provide a long lasting platform from which to deliver voice, video and internet services at urban speeds.

We believe that our proposal aligns with the 150 Mile House official community plan and strategic priorities for sustainable growth well into the future and will provide the technological solution that will deliver the services that the community is looking for.

If the Cariboo Regional District would like more details on our solution I would be happy to provide that in a private meeting. Attached is a coverage zone of the area we plan to improve.

We sincerely appreciate your support in our efforts to build the future of Broadband in British Columbia.

Kind regards,

Falko Kadenbach
Vice President
ABC Communications

Re: Letter of support for ABC Communications Connecting British Columbia Program Application

Dear Sir/Madam,

_____ would like to support ABC Communications application to the Connecting British Columbia Funding Program. _____ stands behind ABC's application to develop a modern urban infrastructure, sustainable broadband solutions to the residents of 150 Mile House.

A modernized network in 150 Miles House will provide the technological solutions and services that 150 Mile House residents have been looking for. A long lasting platform from which to deliver voice, video and internet services at urban speeds would give 150 Mile House residents the means to work from home, expand the job market and make life in 150 Mile House all the more enjoyable.

Thank You
