

RESPONSE SUMMARY

☐ Approval Recommended for Reasons
Outlined Below

☐ Interests Unaffected by Bylaw

☐ Approval Recommended Subject to
Conditions Outlined Below

☐ Approval Not Recommended Due
to Reasons Outlined Below

Interior Health appreciates the opportunity to comment on this proposal, which changes the current zoning designation to permit a change from Industrial to Rural Residential.

The Healthy Community Development supports sound community planning principles while recognizing the need to encourage planned growth.

The rezoning should not influence the capability of the lot to accommodate onsite drinking water and onsite sewerage system.

The parcel is in proximity to a quarry and other facilities therefore the zoning should consider environmental hazards, exposure risks and disruptions to the resident. The quarry and the other industrial activities could pose dust, noise and/or pollution, therefore exposure to environmental risks and disturbance is possible.

The [Healthy Built Environment Linkages Toolkit](#) is an evidence based resource which links planning principle to health outcomes.

Please contact HBE@interiorhealth.ca or the undersigned at 250 851-7347 if you have further concerns or inquiries.
