Northern Health administers first COVID-19 vaccines in Prince George

The first doses of COVID-19 vaccine were administered to a group of high-risk health care workers in Prince George on Tuesday, December 22.

The first person to receive the vaccine in the Northern Health region was Biserka Becker, a care aide at Jubilee Lodge in Prince George (see photo above). Biserka was vaccinated along with a group of health care workers from University Hospital of Northern BC, and the nearby Jubilee Lodge long-term care facility.

Dr. Marietije Slabbert, the physician lead for the Intensive Care Unit (ICU) at UHNBC, was also among the group to receive the vaccine. Dr. Slabbert is considered a high-risk health care worker because of her work in the ICU.

"This has been a really long journey for people working in health care, and the community at large, and it's wonderful that this vaccine has finally arrived in the North; it's like the best Christmas present ever," said Dr. Slabbert. "The teams of physicians, nurses, care aides, cleaners -- everybody has been working so hard, and we'll

continue working hard to get this vaccine to every person in the North who wants to be vaccinated.”

Northern Health is distributing the vaccine in accordance with the priority vaccine groups as recommended by the [National Advisory Committee on Immunization](#), beginning with:

- High-risk health care workers
- Long-term care and assisted living residents

As more vaccines are approved by Health Canada, more communities and more groups of people will receive the COVID-19 vaccine. We expect to be able to immunize all Northern BC residents who wish to have the vaccine by the end of 2021.

All COVID-19 vaccines will be free to everyone in British Columbia.

For more information about the COVID-19 vaccines, vaccine research, priority populations, and the provincial rollout plan, visit the Government of British Columbia's [COVID-19 Vaccines website](#).

BCCDC testing guidelines updated to include priority symptoms

The BCCDC has updated testing guidelines to reflect priority symptoms. People experiencing the following symptoms should seek a COVID-19 test right away:

- Fever or chills
- Cough (Either new onset or worsening/exacerbation of chronic cough)
- Loss of sense of smell or taste
- Difficulty breathing

People experiencing two or more of the following symptoms (not related to any other pre-existing conditions) for more than 24 hours should also seek a COVID-19 test:

- Sore throat
- Loss of appetite
- Extreme fatigue or tiredness
- Headache
- Body aches
- Nausea, vomiting, or diarrhea

For those who have had close contact with a COVID-19 case, and have even a single symptom included above, testing is recommended.

To arrange for a test, contact your physician or nurse practitioner's office, or call the NH COVID-19 Online Clinic & Info Line at **1-844-645-7811**.

More info is on the BCCDC's [COVID-19 testing page](#).
