Dear Darron Campbell

I am writing on behalf of the Quesnel and District Heritage Association. The Antique Machinery Park, operating under the Quesnel and District Heritage Association, has a mission to actively promote the restoration, preservation and display of antique machinery and artifacts important to the history and development of the Quesnel and District region.

Volunteers actively restore, preserve and display the artifacts. Artifacts are viewed in open and closed displays inside the museum and outside. Volunteers maintain the yard, lawns and exhibits. Outside has numerous displays, some covered, on view throughout a large grassed area. Some of the artifacts, such as the saw mill, are operational and are operated on specific holiday times during public viewing.

We are a registered non-profit society # 87239 4267 RR0001. We are soliciting for grant funding to assist us with our project costs. Our projects are aimed at a green initiative and are intended to cut down on our costs and the impact to the environment. We are requesting funding for both projects.

1. Washroom upgrades. Requesting \$7350.00. Installation of low flush and hands free toilets and urinal. This will save on excessive water waste in the septic tank and reduce cross contamination from handling flush handles, door knobs, walls and other areas. Please see attached estimate.
2. Upgrading lighting to LED, requesting \$14627.00 plus taxes. This includes the workshop, museum lighting and exterior security lights. Huge cost savings, LED lighting is significantly cheaper to operate than the existing lighting, LED also gives off more light than what we have at the current time. Currently, the shop is under lighted making it difficult to see properly when working. Please see attached estimate.

Thank you for considering our request for funding. If you have any questions or concerns I may be contacted at the numbers listed above.

Sincerely,

Roland Sawatsky
Director
