Subject: Bouchie Lake Hall Skating Rink Roof Project

Hi Kevin

With Regard to the **Growing Communities Fund** allocations, while I would like to request the whole amount, I think that I would like to request \$500,000 for the above noted project. This year we have allocated \$25,000 to hire a consultant for the Concept Design and Cost Estimate for a Roof over the Bouchie Lake Skating Rink.

There is an allocation of \$500,000 in the 2027 Five Year Capital Budget that has not been funded as of yet for the actual build.

The Roof Project is to ease the labour of creating ice in the winter as our contractor has to remove sometimes man feet of snow before making the ice. This would be an open sided roof made of metal construction and a metal roof.

The skating rink is used for summer activities like basketball, pickleball, ball hockey and can also be rented for private parties. It has the potential to be available for the Pet Safe Coalition Society as a safe place for domestic pets during Evacuation Orders, a shaded place for the Wednesday Summer Markets and other activities.

While we do not have a solid estimated cost in hand yet, the consultant will have something for us later this year (maybe September) and which will have some idea of what the future cost would be in today's dollars.
