

BCHC website integrates PlanH program

BC Healthy Communities and PlanH have amalgamated the two websites under one domain name – bchealthycommunities.ca – to simplify access to resources and strengthen local health initiatives.

The unified platform offers a user-friendly interface, simplifying navigation and resource discovery, and enabling community advocates to better serve their constituents. The PlanH site can now be found at bchealthycommunities.ca/program/planh

"We are thrilled to improve the integration of our robust and legacy PlanH program with our BCHC website into a single, accessible digital platform. This amalgamation will simplify access to crucial healthy communities tools, resources and information, making it easier for communities across the province to find what they are looking for," said Jodi Mucha, Executive Director of BC Healthy Communities.
