Attention: Darron Campbell

The Likely & District Chamber of Commerce would like to apply for up to \$5,000 from the Community Work Fund for placement of moisture protection of Visqueen 10ml over the dirt in the crawl space underneath the main area of Likely Community Hall to act as a vapour barrier.

The placement of the Visqueen 10ml will increase the R value under the hall and reduce heat loss through the floor. The cap over the rising damp air will lower the moisture level in the community hall, which will reduce condensation and risk of mold as well as make the building easier to heat.

Excel Interior Remediation Services has provided an estimated cost for the project, and it is included in this request.

Thank you for considering our request.
