Q7 Based on your previous answer, do you think the CRD should increase, decrease, or maintain existing levels of service for the following functions?  
Note: Increasing service availability/levels requires additional funding from taxation or user fees since costs would increase, whereas a decrease in service availability/levels generally does not. Maintaining existing services would see only increases for inflation.

27	<b>Building Inspection</b> <b>Solid Waste</b> Other than garbage services most of the services offered contain nothing but a hindrance to citizens working to improve their property and lives. Citizens need their rights back to create homes that serve their families without impeding them. Other than sewer and electricity oversight. The \$10 000.00 dollars spent on permits on a house would be better spent on building homes. This would lower the prices for building and create housing for generational families and housing in a very difficult time of demand and no supply.	2/12/2024 12:35 PM
