To Whom it May Concern

It is my privilege to write this letter on behalf of the Bouchie Lake Recreation Commission, offering their support to the Cariboo Regional District in their endeavor to extend the low mobility trail at Claymine Trails located in Bouchie Lake.

At the present time the park is well used by locals and visitors to our community. This includes school groups, seniors and families wanting to enjoy the trail for it's beauty, peacefulness and the opportunity to view the nesting herons along with other assorted wildlife and birds.

There is much room for expansion of the trails in the area which would be ideal for families with small children and persons with mobility issues. Expanding the trails will give these same users the opportunity to explore other areas of the park.

Bouchie Lake draws many out of town visitors who use our local hall for weddings, celebrations of life, birthday parties etc. Claymine Trails is easily accessible and away from the strain of downtown life for those who want to enjoy a bit of nature while they are visiting our lovely community.

Sincerely

Elaine Ross
Secretary BLRC
