**Application Overview**

**Application Timeline** Community Development - Intake 1 - 2026

**Project Description** The project will drill and install a second well at the Miocene Community Centre to improve the reliability of the water supply for the community hall and associated site uses.

**Project Rationale** The Miocene Community Centre is a key rural gathering place located between Williams Lake and Horsefly and provides a range of amenities and programming, including a community garden, barn, playground, and regular events. The Centre hosts weekly activities, monthly community breakfasts, seasonal celebrations, and private bookings. The Centre is also intended to support community resilience by serving as a gathering location during emergencies such as heatwaves or wildfire-related disruptions. The applicant reports that the existing water supply can be unreliable during high-use periods and drought conditions, limiting the Centre's ability to provide drinking water, hygiene, and food preparation services. A second well is proposed as a backup water source to improve service continuity for the facility and grounds, support garden maintenance and planned livestock-related uses, and strengthen the Centre's capacity to support the community during emergency events.

**Application Reviews****00014051**Status **In Progress**Reviewed By **Jordan Hammond**

Due Date

Project Score **38**Application Recommendation **Award****Staff Considerations****2**

Staff considerations The applicant reports the current well (~5 gpm) can be strained during large events and does not support planned livestock use at the new barn; the second well is intended to provide backup capacity and resilience.

**1**

Staff considerations The applicant proposes a secondary well to improve water reliability for the Miocene Community Centre, a multi-use rural community facility that supports regular programming and may serve as an emergency gathering location.

**3**

Staff considerations The funding plan totals \$27,460: \$5,000 confirmed from Williams Lake Community Forest, \$5,000 donated materials, \$3,460 applicant contribution, and \$9,000 requested from NDIT; Horn Levy \$5,000 and the CRD Resolution of Support remain pending.
